

WABASH & ERIE CANAL INTERPRETIVE CENTER AND CANAL BOAT

Located in Canal Park along a section of restored canal, this interactive museum tells the story of the building of the Wabash & Erie Canal and how it affected Indiana and the local area during its 30 years of local operation. The Wabash & Erie Canal was the second longest canal in the world; the Grand Canal of China was the only one longer. Canal Park showcases state of the art exhibits like a real water model of a canal-including an operational reservoir, aqueduct, lock & gristmill. The center has become a regional attraction with exhibits to entice children as well as adults.

While visiting the Interpretive Center visitors can enjoy a cruise on THE DELPHI. This beautiful tour boat is a replica of a working 1850's canal boat freighter designed to maximize enjoyment of the historic canal.

The Interpretive Center is open to the public year round on weekends and during travel months on Thursday & Friday afternoons. Over 7 miles of historic trails have been developed for walking and biking; these include three National Register Sites connected to the canal.

The Canal Association hosts Canal Days Festival every July in Canal Park in Delphi. The opening of the center has ushered in an exciting new era of historic education for participants of all ages.
